[exp: 12/31/2024]

Crowe LLP has in-depth experience with creating and managing both niche and company-wide regulatory compliance programs for manufacturers and distributors with complex supply chains. Our team has expertise with a variety of regulations, including chemical regulatory (OSHA GHS, HazCom 2012, California Prop 65, EHS, Product Stewardship, EU REACH, EU RoHS, TSCA, etc.) and other sourcing and supply chain regulatory topics (Conflict Minerals, Extended Minerals Due Diligence, Anti-Human Trafficking Regulations, UK Modern Slavery Act, etc.) with a growing focus on Environmental, Social, and Governance (ESG) initiatives. We take on many roles for our clients and can tailor services to fit a specific business. We provide advisory services, perform due diligence, survey suppliers for regulatory information, create and present training materials to clients' employees, and draft relevant documents and disclosures. Crowe has multiple offices across the U.S. and our extended team can also provide audit and tax services in addition to product and supply chain compliance efforts.

Karin F. Baron, MSPH

Program Manager

Chemscape Safety Technologies

1607 W Christan Way

Riverton, UT 84065 United States

awheeler@chemscape.com

Chemscape offers sdsBinders compliance software to manage your Safety Data Sheets (SDSs) as well as our Chemical Hazard and Assessment Management Program (CHAMP) that goes beyond SDS Management Software to provide a clear picture of the chemical hazards your workers are handling. Go beyond HazCom/WHMIS compliance and empower your team to actively participate in the chemical health and safety at work. Our software shares insight with workers that was once the domain of chemical experts. Chemscape identifies chemical health hazards which is a critical first step prior to controlling risk before a chemical exposure or incident occurs. Chemscape provides a reliable central hub of information that reaches all your job sites quickly. Additional information can be posted in your portal in to reinforce internal best practices on chemical health and safety. Workers become more proactive in chemical safety when they see how chemicals can impact their personal health and the environment.
