

SDS PPE Selection and Guidance

Amanda Edberg, ASP
Sr. EHS Account Manager
Institute for Environmental Assessment

Presenter biography

Amanda Edberg has worked with the Institute for Environmental Assessment for over four years as a health and safety consultant for facilities, performing health and safety inspections, confined space assessments, safety trainings, LOTO assessments, chemical hygiene assessments, radon and lead-in-water testing. Amanda works regularly with clients to assist with OSHA General Industry compliance.

Presentation abstract

This presentation will describe the process of compiling hazard controls for Section 8 of the Globally Harmonized System Safety Data Sheet, including how to select PPE for specific chemicals following the hierarchy of controls and industry guidelines. With a wide variety of resources, it's hard to know where to start. This presentation will highlight top resources including the United Nations Guidance on the Preparation of Safety Data Sheets, OSHA, AIHA, and PPE manufacturer guidance. Delve into chemical properties that determine compatible material protection, permeation, and degradation data.
