Health Hazard Determination and Risk Assessment

Sunday, September 25, 2016

Crystal Gateway Marriott Hotel – Arlington, Virginia

Course Description

This course is designed to be an overview of the principles of health hazard determination and risk assessment as they relate to hazard communication. An emphasis is placed on the scientific and regulatory requirements for defensible hazard determinations and risk assessments. The goal of this course is to provide participants with the basic tools necessary to determine the potential hazards of a material and the likelihood or probability that these hazards will cause adverse effects in a particular situation. The skills developed in this course will better allow participants to understand and/or participate in the decision-making aspects of MSDS and label development and the determination of appropriate markets and uses for products.

This is considered to be an advanced course. While there are no formal prerequisites for this course, it is recommended that participants have a working knowledge of MSDS and labels and that they either have taken the SCHC courses *Toxicology for Hazard Communication*, *Industrial Hygiene and Safety for Hazard Communication*, and *Ecotoxicology for Hazard Communication* or be comfortable with the principles presented in these courses.

Intended Audience

Hazard communication professionals looking for a comprehensive overview of health hazard determination and risk assessment.

Course Director / Instructor

Robert Skoglund, Ph.D., DABT, CIH

Dr. Skoglund is the Director of Product Safety and Regulatory Affairs at Covestro LLC. His responsibilities include product EHS and stewardship, including hazard communication, for North America.

Course Instructors

Robert Roy, Ph.D., DABT

Dr. Roy is a Lead Toxicology Specialist at 3M in St. Paul, Minnesota. His primary responsibilities include assessing the human health hazards and safety of products and other materials for several 3M business units. In addition, he leads the development of the 3M Occupational Exposure Guidelines; and plays a leadership role for California Proposition 65 compliance, consumer product labels, and hazard determination, hazard communication, and human risk assessment issues.
