Classification, Labelling and Safety Data Sheet Requirements in EU

Saturday, September 22 through Sunday, September 23, 2018
Arlington, Virginia

Course Description and Objectives

Although the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) has been implemented in both the US and the EU there are significant differences in each jurisdiction's regulations. In the EU the classification and labelling parts of the GHS are implemented through the CLP Regulation, whilst the safety data sheet requirements are implemented through REACH.

This course will outline the key requirements of CLP and REACH with respect to hazard communication and highlight the differences with Hazcom 2012. Practical exercises will be held throughout the course to reinforce the learning.

Intended Audience

It is assumed that delegates will have a working understanding of the GHS classification, labelling and safety data sheet requirements in the U.S.

Course Fee: \$850 / members \$940 / non-members

Course Director / Instructor

Gill Pagliuca

Gill Pagliuca has worked in chemical safety for more than 25 years, providing consultancy services including classification and preparation of safety data sheets for a wide range of customers and products. Gill runs the CHCS modules on classification of substances and mixtures. She is also the current Chair of the CHCS.

Course Instructor

Mark Selby

Mark had many years' experience with a major test house before setting up his own business and runs the very successful CHCS modules on ecotoxicology, advanced SDS writing and Exposure Scenarios.
