Health Hazard Determination and Risk Assessment

Sunday, September 23, 2018

Crystal Gateway Marriott Hotel – Arlington, Virginia

Course Description

This course is designed to be an overview of the principles of health hazard determination and risk assessment as they relate to hazard communication. An emphasis is placed on the scientific and regulatory requirements for defensible hazard determinations and risk assessments. The goal of this course is to provide participants with the basic tools necessary to determine the potential hazards of a material and the likelihood or probability that these hazards will cause adverse effects in a particular situation. The skills developed in this course will better allow participants to understand and/or participate in the decision-making involved in the development and application of MSDS and label and the determination of appropriate markets and uses for products.

This is an advanced course. While there are no formal prerequisites for this course, it is recommended that participants have a working knowledge of MSDS and labels and that they either have taken the SCHC courses *Toxicology for Hazard Communication*, and *Industrial Hygiene and Safety for Hazard Communication* or be comfortable with the principles presented in these courses.

Intended Audience

Hazard communication professionals looking for a comprehensive overview of health hazard determination and risk assessment.

Course Director / Instructor

Robert Skoglund, Ph.D., DABT, CIH

Dr. Skoglund is the Director of Product Safety and Regulatory Affairs at Covestro LLC. His responsibilities include product safety, compliance, stewardship, and sustainability for North America - including hazard communication.

Course Instructor

Catherine F. Jacobson, Ph.D., DABT

Dr. Jacobson is a Senior Toxicology Specialist at the 3M Company. Her primary responsibilities include assessing the human health hazards and risks of raw materials, chemical intermediates, and products for several 3M business units. In addition, she oversees the authoring of hazard communication documents and develops comprehensive health hazard profiles for chemical substances important to 3M.
