Advanced Topics in EHS: Alternative Assessments

Sunday, March 29, 2020

Charlotte Marriott City Center – Charlotte, North Carolina

Course Description

The Advanced Topics in EHS series of courses are designed to expand on topics that are introduced in other SCHC courses. The topic of alternative assessments is introduced in the *Advanced Topics in EHS: Risk Management and Communication course*.

This course is designed to provide an overview of the principles of alternative assessments as they relate to the identification, evaluation, and comparison of substitutes for hazardous products and/or components. This course will focus on the National Research Council's framework for the evaluation of chemical alternatives. The objectives of this course are to: 1) provide participants with an understanding of the complexities associated with conducting an alternatives assessment, 2) expose them to the key tools and online databases needed to complete a reproducible and defensible assessment, and 3) to emphasize the role and importance of hazard assessment, classification, and communication in the alternative assessment process.

This is an advanced course. While there are no formal prerequisites, it is recommended that participants have a working knowledge of health and environmental hazards comparable to that provided in the SCHC courses *Toxicology for Hazard Communication* and *Ecotoxicology for Hazard Communication*.

Intended Audience

Hazard communication professionals interested in participating in the assessment of alternatives for hazardous products and components.

Course Fee: \$275.00 members // \$365.00 non-members

Course Director / Instructor

Robert Skoglund, Ph.D., DABT, CIH

Dr. Skoglund is the Director of Product Safety and Regulatory Affairs at Covestro LLC. His responsibilities include product safety, compliance, stewardship, and sustainability for North America - including hazard communication.
